

Head Cancer to Lymphoma

HEAD CANCER

AHNS - American Head and Neck Society

AHNS is the single largest organization in North America for the advancement of research and education in head and neck oncology. It was created in 1998 by the merger of two societies, the American Society for Head and Neck Surgery and the Society of Head and Neck Surgeons, formed the American Head and Neck Society. The website site is geared toward surgeons and medical professionals, but has a section on patient education. www.headandneckcancer.org

Head and Neck Cancer Alliance

The Head and Neck Cancer Alliance seeks to enable an organized and strategic alliance of all stakeholders to dramatically shift the stage of discovery of head and neck cancers through united and collaborative efforts in prevention, early detection and research. The Alliance mission involves providing support to head and neck cancer patients throughout the year, supporting ongoing research in head and neck oncology, educating children and adults on the disease process, treatment and prevention of head and neck cancer. <http://www.headandneck.org/site/c.8hKNI0MEImI4E/b.6281225/k.BDD9/Home.htm>

MedlinePlus - National Library of Medicine and National Institutes of Health - Head and Neck Cancer

Head and neck cancer includes cancers of the mouth, nose, sinuses, salivary glands, throat, and lymph nodes in the neck. This site includes information on diagnosis, symptoms, treatment, clinical trials, anatomy/physiology, and patient handouts (available in Spanish). <https://www.nlm.nih.gov/medlineplus/headandneckcancer.html#cat51>

National Cancer Institute - Head and Neck Cancers

This site presents information regarding head and neck cancers - cancers that arise in the head or neck region (in the nasal cavity, sinuses, lips, mouth, salivary glands, throat, or larynx [voice box]). The sections of the site include treatment, prevention, screening, coping, clinical trials, research, and statistics. A fact sheet is also available which covers the risk factors, symptoms, diagnosis, treatment, follow up, and rehabilitation for cancers of the head and neck. <http://www.cancer.gov/cancertopics/types/head-and-neck>

The Research and Education Foundation of the American Head and Neck Society

The Research and Education Foundation of the American Head and Neck Society (AHNS) is working to encourage and fund science and clinical research in head and neck oncology, support and fund individuals and institutions in the development of educational programs or materials in head and neck cancer, and support educational endeavors that improve knowledge, techniques, and skills of practitioners devoted to the care of head and neck cancer patients. www.ahnsfoundation.info

Support for People with Oral and Head and Neck Cancer (SPOHNC)

Support for People with Oral and Head and Neck Cancer (SPOHNC) is a self-help nonprofit organization involved in the development of programs of support. It is dedicated to raising awareness and meeting the needs of oral and head and neck cancer patients through its resources and publications. Head cancer falls within this group of cancers. It provides support through local chapters, a national survivor volunteer network which matches people by diagnosis and treatment, the publication of a newsletter and books, and resource links. <http://www.spohnc.org/index.php>

THANC - Thyroid, Head and Neck Cancer Foundation

The mission of the THANC Foundation is to support research and education in the early detection and treatment of thyroid and head and neck cancer, to advance new therapies, and to alleviate the suffering and functional impairment of patients who undergo treatment. <http://thancfoundation.org/about/overview/>

HEPATOBLASTOMA

The American Childhood Cancer Organization - Hepatoblastoma

The American Childhood Cancer Organization (ACCO) is one of the nation's largest grassroots organizations at the forefront of the crucial battle against childhood cancer. They are dedicated to improving the lives of children living with childhood cancer or its long-term impacts, and to offering critical advice, support, and assistance to families engaged in this life-altering struggle. <http://www.acco.org/?s=Hepatoblastoma&submit=Search>

Children's Cancer Research Fund

Children's Cancer Research Fund, a national nonprofit 501 (c)3, which supports the pioneering efforts at the University of Minnesota in research related to the prevention, diagnosis, treatment, and cure of childhood cancers. http://www.childrenscancer.org/main/about_us/

HEPATIC ANGIOSARCOMA

American Liver Foundation

The mission of the Foundation is to facilitate, advocate and promote education, support and research for the prevention, treatment and cure of liver disease. The site includes liver disease information, brochures and handouts in several different languages, support services such as a hotline, support group referrals, drug discount card, and links to Caringbridge to get help with a website and Needymeds for financial assistance. <http://www.liverfoundation.org/about/>

HEPATOCELLULAR CARCINOMA (See also LIVER CANCER)

American Liver Foundation

The mission of the Foundation is to facilitate, advocate and promote education, support and research for the prevention, treatment and cure of liver disease. The site includes liver disease information, brochures and handouts in several different languages, support services such as a hotline, support group referrals, drug discount card, and links to Caringbridge to get help with a website and Needymeds for financial assistance. <http://www.liverfoundation.org/about/>

Blue Faery - The Adrienne Wilson Liver Cancer Foundation

Blue Faery's mission is to prevent, treat and cure primary liver cancer, specifically Hepatocellular Carcinoma, through research, education and advocacy. [Adrienne's Story](#)

National Cancer Institute – Liver Cancer

The National Cancer Institute is part of the National Institute of Health, one of 11 agencies currently operating under the umbrella of the Department of Health and Human Services. In addition to research conducted in its own clinics and laboratories, the NCI supports and coordinates research projects through cancer centers, hospitals, and universities, while also being the primary federal entity responsible for disseminating information about cancer. The National Institutes of Health National Cancer Institute's site regarding liver cancer includes information on treatment, prevention, screening, coping, clinical trials, research, and statistics. <http://www.cancer.gov/cancertopics/types/liver/>

HODGKIN LYMPHOMA

Leukemia & Lymphoma Society

The mission of The Leukemia & Lymphoma Society (LLS) is: Cure leukemia, lymphoma, Hodgkin disease and myeloma, and improve the quality of life of patients and their families. LLS states that it is the world's largest voluntary health agency dedicated to blood cancer. LLS funds lifesaving blood cancer research around the world and provides free information and support services. www.lls.org

Lymphoma Foundation of America

Lymphoma Foundation of America is the national organization devoted solely to helping lymphoma patients and their families. It advocates your right to know the truth about the risks and benefits of cancer treatments — whether standard, experimental, or alternative. The organization is dedicated to helping you find the best care available for your type of lymphoma. They offer support, experience, advice, and a helping hand. All programs and services are free. www.lymphomahelp.org/index.htm

LymphomaInfo.net

This site regarding Hodgkin Lymphoma includes a discussion on the description, incidence, timeline, comparison, diagnosis, treatment, research, and support. <http://www.lymphomainfo.net/hodgkins>

Lymphoma Research Foundation

LRF is the largest non-profit organization in the nation devoted exclusively to funding innovative lymphoma research and providing people with lymphoma and healthcare professionals with up-to-date information about this type of cancer. LRF's mission is to eradicate lymphoma and serve those touched by this disease. It is dedicated to funding biomedical research focused on the origins, treatment and identification of a cure for lymphoma; to raising public awareness of the disease; and providing support and services to people with lymphoma, their families and caregivers. Information sections include clinical trials, financial assistance and support and resources. <http://www.lymphoma.org/site/pp.asp?c=bkLTKaOQLmK8E&b=6301935>

National Cancer Institute – Hodgkin Lymphoma

The National Cancer Institute is part of the National Institute of Health, one of 11 agencies currently operating under the umbrella of the Department of Health and Human Services. In addition to research conducted in its own clinics and laboratories, the NCI supports and coordinates research projects through cancer centers, hospitals, and universities, while also being the primary federal entity responsible for disseminating information about cancer. The National Cancer Institute's site regarding Hodgkin Lymphoma includes information on treatment, prevention, screening, coping, clinical trials, research, and statistics. <http://www.cancer.gov/cancertopics/types/hodgkin>

1UpOnCancer This site states that it was started for a place to get good news. You can visit to learn about survivors and organizations doing incredible things, and to learn about promising research. It also has information about lifestyle choices to cut your chance for recurrence or to live well if you have metastasized. Visit for “Freebies for Cancer Patients” and other resources. And if you want a good laugh, click on the “Humor” link. It has information on cancer in general and specific information on cancers of the Blood, Breast, Cervical, Childhood, Colorectal, Lung, Melanoma, Ovarian, Prostate, and Uterine. <http://www.1uponcancer.com/>

HYPOPHARYNX CANCER

Cancer.Net - Laryngeal and Hypopharyngeal Cancer

Cancer.Net provides timely, comprehensive, oncologist-approved information from the American Society of Clinical Oncology (ASCO), with support from the Conquer Cancer Foundation. Cancer.Net's Guide to Laryngeal and Hypopharyngeal Cancer provides information on statistics, medical illustration, risk factors, symptoms, diagnosis, staging, treatments, clinical trials, research, and coping . <http://www.cancer.net/cancer-types/laryngeal-and-hypopharyngeal-cancer>

Head and Neck Cancer Alliance

The Head and Neck Cancer Alliance seeks to enable an organized and strategic alliance of all stakeholders to dramatically shift the stage of discovery of head and neck cancers through united and collaborative efforts in prevention, early detection and research. The organization's mission involves providing support to head and neck cancer patients throughout the year, supporting ongoing research in head and neck oncology, educating children and adults in the disease process, treatment and prevention of head and neck cancer. <http://www.headandneck.org>

The IAL (International Association of Laryngectomees)

The mission of IAL is to stimulate, support and improve the relations among persons who, due to the removal of the larynx because of cancer or other reasons, have lost their natural voices; to encourage and maintain an exchange of ideas and methods for learning and teaching alaryngeal methods of communication; and to improve the understanding of employers about cancer in general and cancer of the larynx in particular, so that laryngectomized persons may retain or obtain employment after surgery. <http://www.theial.org>

Oral Cancer Foundation

This site provides information about the rates of occurrence, risk factors which lead to oral cancer, signs and symptoms, treatments, current research, complications of treatment, nutrition, related clinical trials, and current oral cancer related news. There is an additional resource page dedicated to links to other sources of vetted information about oral cancer and treatment institutions. <http://www.oralcancerfoundation.org>

Support for People with Oral and Head and Neck Cancer (SPOHNC)

Support for People with Oral and Head and Neck Cancer (SPOHNC) is a self-help nonprofit organization involved in the development of programs of support. It is dedicated to raising awareness and meeting the needs of oral and head and neck cancer patients through its resources and publications. Hypopharyngeal cancer falls within this group of cancers. It provides support through local chapters, a national survivor volunteer network which matches people by diagnosis and treatment, the

publication of a newsletter and books, and resource links. <http://www.spohnc.org/index.php>

Throat Cancer Foundation

Throat Cancer Foundation (TCF) is dedicated to reducing the impact of throat cancers on society and on individuals. It offers support, and wants to ensure that anyone affected – patients, caregivers and loved ones – have access to the most up-to-date information available regarding their illness, the available treatments, and what to expect in recovery. TCF works to reduce the occurrence of throat cancer cases by funding research into prevention and cure, advocating healthier lifestyles and campaigning for universal HPV vaccination. www.throatcancerfoundation.org/.../95_hypopharyngeal_cancer

KARPOSI'S SARCOMA

American Cancer Society - Kaposi's Sarcoma

The American Cancer Society is a nationwide network of community based, voluntary health organizations committed to the research and defeat of cancer. This site includes information on Kaposi's Sarcoma including statistics, signs and symptoms, diagnosing, staging, causes, prevention, coping, treating, support programs, and research. <http://www.cancer.org/cancer/kaposisarcoma/index>

Cancer.Net - Sarcoma - Kaposi

Cancer.Net provides timely, comprehensive, oncologist-approved information from the American Society of Clinical Oncology (ASCO), with support from the Conquer Cancer Foundation. Cancer.Net's Guide to Kaposi's Sarcoma provides information on statistics, risk factors, symptoms, diagnosis, staging, treatments, clinical trials, research, after treatment, questions to ask doctors, and additional resources. <http://www.cancer.net/cancer-types/sarcoma-kaposi>

Kaposi Sarcoma Treatment (PDQ®) - National Cancer Institute

This site of the National Cancer Institute of the National Institutes of Health presents information regarding Karposi's Sarcoma including sections on diagnosis, signs, different types, treatment options, and clinical trials. <http://www.cancer.gov/cancertopics/pdq/treatment/kaposis/Patient>

MedlinePlus - U.S. National Library of Medicine - Kaposi's Sarcoma

This site on Karposi's Sarcoma includes information on diagnosis, symptoms, treatment, prevention/screening, clinical trials, research, statistics, organizations, and patient handouts. www.nlm.nih.gov/medlineplus/kaposissarcoma.html

KIDNEY CANCER (See also RENAL BODY AND RENAL PELVIS CANCER)

The American Cancer Society – Kidney Cancer

The American Cancer Society is a nationwide network of community based, voluntary health organizations committed to the research and defeat of cancer. This American Cancer Society site includes information on kidney cancer including statistics, signs and symptoms, staging, causes, coping, treating, clinical trials, support programs, and research. <http://www.cancer.org/cancer/kidneycancer/index>

Kidney Cancer Association

Kidney Cancer Association is a charity that serves families that are dealing with kidney cancer. The primary focus of the organization is on research, education both for medical professionals and for patients and advocacy on behalf of the needs of patients with the government and with insurance companies. This site includes information on treatments, expert doctors, financial help, support meetings, and a Nurse Hotline. www.kidneycancer.org

The National Kidney Foundation (NKF)

The National Kidney Foundation (NKF) has been providing help and hope to kidney patients and their families since 1950. Its main aim is to improve the health and well-being of individuals and families affected by kidney disease. The site offers information regarding kidney disease, prevention, organ donation and transplantation, peer support, dialysis, emergency resources and a Helpline. <https://www.kidney.org/>

LARYNX CANCER

The American Cancer Society – Laryngeal Cancer

The American Cancer Society is a nationwide network of community based, voluntary health organizations committed to the research and defeat of cancer. The ACS cooperates with and encourages coordination among cancer specialists and doctors throughout the country in the fight against cancer. They also support research to learn more about the causes of the disease. This American Cancer Society site includes information on laryngeal cancer including statistics, signs and symptoms, diagnosing, staging, risk factors, causes, treating, and research. <http://www.cancer.org/cancer/laryngealandhypopharyngealcancer/index>

The International Association of Laryngectomees (IAL)

The International Association of Laryngectomees (IAL) is a non-profit voluntary organization composed of approximately 250 member clubs and recognized regional organizations. These clubs are generally known as "Lost Chord" or "New Voice" clubs. Clubs are composed of from 10 to more than 300 Laryngectomees. The purpose of the IAL is to assist these local clubs in their efforts towards the total rehabilitation of the Laryngectomee. <http://www.theial.com>
